SUMMARY

I am a Bachelor of Business & Information Technology graduate, Strathmore University. Currently finished Software Engineering at Moringa School. Currently I am able to provide technical support, receive instructions accurately and provide the needed results in detail through a methodical approach. Equipped with Front-End development, React and Three.js, and Back-End development, Node.js, flask and PostgreSQL. I have the ability to boost system performance through evaluating and correcting different software issues. Innovative and driven with passion for delivering high-quality work.I carry out instructions on work related matters, accurately and within required deadlines. I am a team player, diligent, proactive and a self-starter committed to computer software related development areas and extending my learning.

SKILLS

- **UI/UX Design:** Skilled in creating intuitive and engaging user interfaces with experience in
- Figma, Tailwind, and Flowbite.
- **Front-End Development:** Proficient in JavaScript, React, HTML, and CSS.
- **Back-End Development:** Experienced with Node.js, Python, and Flask.
- **Three.js:** Expertise in 3D graphics and interactive web applications.
- **Solidity:** Basic knowledge of smart contracts.
- **Performance Optimization:** Ability to enhance application speed and efficiency.
- **Software Debugging & Troubleshooting:** Skilled in diagnosing and fixing technical issues.
- **Technical Analysis:** Proficient in analyzing and addressing technical problems.
- **Time Management & Goal-Oriented:** Effective at managing time and working towards clear
- objectives.
- **Teamwork & Interpersonal Skills:** Strong collaborator with excellent communication and
- teamwork abilities.
- **Technical Documentation:** Familiar with creating and maintaining documentation for
- software projects.
- **Microsoft Office & Google Suite:** Proficient in office productivity tools.

Projects

- TuzoFund
- Verbalscripts
- Excency

TuzoFund - https://tuzofund.co.ke/
A platform designed to connect willing sponsors with underprivileged students/kids, fostering opportunities for education and personal development. Built from scratch with an emphasis on accessibility and impact.

Excency - https://exency.vercel.app/
A digital wallet solution that simplifies international fund usage. Enables seamless management and transfer of funds across different countries, addressing the challenges of cross-border financial operations

Verbalscripts (UI/UX Project) - https://www.verbalscripts.com/
A UI/UX design project focused on transcription services, catering to legal, medical, general, and media production needs. Delivered an intuitive and responsive interface tailored to the client's requirements.
